The Standard AND RIVER PLATE NEWS.

No. 1980—Eighth Year. BUENOS AYRES, THURSDAY, SEPTEMBER 17, 1868. Circulation 3000

MAUA BANK,
101-103 CALLE CANGALLO

The offices of this Bank having been removed to the above spacious building, in order to suit the increasing flow of business, the public is informed that the following transactions are carried on in currency and specie in this Bank:—

First—Bills and obligations with good signatures are discounted on conventional terms.

Second—Money is advanced on mercantile and other securities approved of by the Manager.

Third—Accounts current are opened with Merchants or other parties who may prefer depositing endorsed and transferable securities, against which they may draw up to an amount previously convened under conditions established for such class of operations.

Fourth—Money is received in account current, bearing interest from day of deposit, which is accumulated in favor of the parties every three months, the depositors being allowed to retire at any time, by means of checques, part or the full amount at their wish, save when the quantity exceeds three hundred doubloons or one hundred thousand dollars currency, in which case forty-eight hours' previous notice is required to be given at the Treasury of the Bank.

Fifth—Bills or letters of credit are drawn and taken on Montevideo, Rosario, Sta Fé, Salto Oriental, Paysandu, Rio Janeiro, and other places in the Brazils, England and France, as also on other places, of which notice will be given hereafter.

Finally, the Bank undertakes and executes all legitimate transactions within the orbit of banking operations.

The establishment is always open from 10 a.m. till 3 p.m.

P. P. Maua & Co.

SOUTHERN CAMPS.—To be Disposed of, by the Owner being about to leave for Europe, Two Thousand Five Hundred fine Mestiza Sheep, crossed with French Rams, with the right of Pasture on a Suerte of Estancia. The Land is of the best quality for the Breeding of Sheep Stock, and is situated 75 leagues south of Buenos Ayres. The post town lies within a league of the Camp, where there is a regular communication with the City twice a-week in winter, and three times in summer. The Land can be obtained on the same terms as held by the present Tenant—viz. Rent Free, until such time as the Titles are made secure, with the right of purchaser afterwards. To any Party having only a small capital at command, this is an opportunity that seldom occurs. For particulars, apply at CLAYPOLE, BROTHERS, 23 Calle Defensa, Buenos Ayres. 217,xp,a2

BUSINESS FOR SALE.—In consequence of one of the Proprietors returning to Europe, a half Share, or the whole, of the Bowling Alley in Montevideo, is now offered for Sale.

During the Twelve Months it has been in operation this Establishment has worked its way into Public Favor, and is now doing a Steady and Lucrative Business, being the only place of Public Amusement in Montevideo, frequented by Englishmen, Americans, and Germans.

To an active enterprising Englishman, American, or German, the present offers an opportunity seldom met with in the River Plate of getting into a safe and paying Business, on a comparatively small outlay. Any knowledge of the Spanish Language quite unnecessary.

For full particulars apply personally or by letter to the Bowling Alley, 70 Calle 25 de Agosto, Montevideo. 3 1m s19

THE PROVINCIAL BANK OF BUENOS AYRES.

BUSINESS HOURS FROM 10 A.M. TO 4 P.M.

Deposits of not less than $400 m/c. and $f.16 received. These deposits will not be entitled to interest if retired before the expiration of sixty days from the date of such deposit; after sixty days they will be entitled to interest from the date of the deposit. All interests not collected shall at the end of each year be capitalized. All deposits at interest shall be entered in a book which the Bank will deliver to the depositors, in which all payments of interest and capital shall be entered, and all interest shall be payable after the first of the month or on retiring the deposit.

The Bank also receives deposits in account current, payable at sight, as above-mentioned.

The Bank discounts bills with two signatures having from seven to ninety days to run; it also discounts mercantile bills of from seven days to six months, on the condition that at maturity they are paid in full.

The Bank draws at sight upon the following branches:—

DOLORES,	CHIVILCOY,
SAN NICOLAS,	MERCEDES,
LOBOS.	

The Bank pays commission to Brokers on the first discounting of bills and promissory notes.

LOANS TO THE WORKING CLASSES.

The Bank lends to artizans and operatives sums from three to twenty thousand dollars on their own signature, taking as security a document with any well-known signature

CREDITS IN ACCOUNT CURRENT.

1st. The Bank opens accounts current for commercial houses.

2nd. The security to be either personal, or with documentary values.

3rd. In each case the Bank shall fix the amount of credit.

4th. The Directory shall from time to time arrange the interest chargeable *pro* and *contra*.

5th. Each account shall be liquidated every 60 days.

6th. A pass-book will be given to parties opening accounts current, for entry of cheques and sums deposited.

"LA ESTRELLA"
ARGENTINE COMPANY FOR INSURANCE AGAINST FIRE, AT FIXED PREMIUM.

CAPITAL, ... 2,000,000 HARD DOLLARS

[Sanctioned by Decree of National Government, October 24th, 1865. Also by the Provincial Executive, dated 23rd of same Month and Year.]

MANAGING COMMITTEE.
President:
Don Antonio Demarchi.
Vice-President:
Don Enrique Achon.
Directors:
Señor Don Tomas Armstrong.
" " Eduardo Lumb.
" " José Martinez de Hoz.
" " Francisco Bustamante.
" " Manuel S. de Zumaran.
Director-General:
Don Francisco F. Moreno.
Inspector
Guillermo Sohnidber.

The Company Insures against Fire on very small Premiums. Every class of Buildings and Goods, whether private or industrial.

Goods in Customs Deposit may be likewise Insured.

Insurers in this Company contract no othe obligation than the payment of the stipulater Premium on the Policies, the Company being only responsible for such injuries as they may suffer from Fire.

Among the general conditions of the Policy, there is one of particular advantage to Mortgage Creditors.

The Company offers the following Rewards:—
$f.40 To the first Hose ready to lend assistance.
$f.20 To the second do. do.
$f.20 To the first pipe of water.
$f.4 To each of the five succeeding pipes
Which run to the Fire of any Edifice or Property Insured in THE ESTRELLA, on making known his choice of the Reward, or a Certificate issued by the Police authorities to such as shall have assisted at the mishap.

The Company will also give a Reward of $f.4 to whoever shall present themselves at their Office, to give Notice of any Fire within the Municipal

POLICIES Issued, and all further particulars to behad, at the Head Office, No. 118, PIEDAD; or at any of the Country Agents.

THE BIENHECHORA DEL PLATA LIFE ASSURANCE COMPANY.

SPLENDID INVESTMENT
FOR THE
CAPITALISATION OF SMALL INCOMES, PENSIONS, RENTS, &c.

Government Delegate:
Sr. Don José Maria Cantilo.
Committee.
Señor Don Victor Martinez.
" " Eduardo T. Mulhall.
" " Francisco Alcobenaas.
" " Hugo Brunge.
" " Estanislao Frias.
" " Director-General:
Don Francisco F. Moreno.
Office:
118, CALLE PIEDAD (Upstairs).

POSITION OF THE COMPANY,
MARCH 1ST, 1868.
Subscribed Capital:
Hard Dollars, 2,730,865·69.
No. of Policies,.. 2,644 | Securities, $f.838,920·41

It being an admitted fact, that "Money makes money," the object of LA BIENHECHORA could not be better, since it opens a vast Savings Bank for the surplus or savings of the Public, so that, by the proper employment of these small gains, a moderate capital, or even annuity, may be secured in a short time. By this means a provident, though helpless, family can husband their small means, and, in the end, attain a competency.

It being proved that the accumulation of interest is the most powerful means of augmenting the capital, THE BIENHECHORA DEL PLATA—an Argentine Company, whose only investments are in the country—holds out to Subscribers greater advantages than any other Institution, by reason of all its dealings being in the River Plate, where are current as large interests as in any part of the world.

THE BIENHECHORA DEL PLATA receives Deposits of from Five Patacones per Annum up to any amount in Weekly, Monthly, or Yearly Instalments.

☞ Subscribers enrolled and all necessary information given at the Head Offices of the Company, 118, Calle Piedad, Buenos Ayres.

CENTRAL URUGUAY RAILWAY.

The undersigned have been appointed agents in this city, by the Montevidean Directory, to enrol subscribers for this great national enterprise.

Prospectus, etc., can be seen at this office,
M. G. and E. T. MULHALL,
Standard Office, Buenos Ayres.

"THE QUEEN" FIRE AND LIFE INSURANCE COMPANY.

CAPITAL, £2,000,000.

INCOME, £160,000.

LIVERPOOL AND LONDON.

Insurances against loss or damage by fire may be effected with this Company on Dwelling Houses, Warehouses, Buildings, Merchandize and Goods in the Custom-house, Bonded Stores, and private ones, Produce in the Barracas or in Deposit Stores, in the Lighters or on Board; and on nearly every description of property.

Rates of premium vary according to the nature of the risks, and will be found as moderate as those of other first-class offices.

Losses by Explosion of Gas paid for. Loses by fire arising from lightning made good.

The advantages obtained by those who assure with the "Queen" are fully mentioned in the prospectuses. Life Policies are indisputable; advances to policy holders, &c. The "Queen" enoys to so great an extent the confidence and support of the public in England that the Postmaster-General has selected it, for the insurance of the lives of the clerks and other officials.

The undersigned General Agent of the Queen Fire and Life Insurance Company is duly authorized by power of attorney to issue policies and to settle and pay losses in Buenos Ayres with promptitude and liberality, without reference to the chief office in England.

Official registration has been entered in the Registro Publico, in accordance with the existing laws of this Republic.

Apply for Insurances and other details from 11 to 3 daily, No. 121 Calle 25 Mayo, corner of Corrientes, to

CONSTANT SANTA-MARIA,
General Agent of the Company.

DR. WHITE'S ENGLISH COLLEGE.

DR. WHITE thanks those of the British Community who have as yet supported him in his endeavors to establish a High School for the Education of their Sons. He has now succeeded in obtaining Castellano's Quinta, 303 Calle San Martin, situated in one of the most picturesque and salubrious parts of this City. The House and Grounds are eminently suitable for the establishment of a superior

BOARDING AND DAY-SCHOOL,

being on the City pavement, easily accessible to Day Pupils, and yet enjoying the extensive views and healthy air of a Country residence.

Dr. White is ready at once to receive applications from those who desire for their Sons the comforts of a British Home, the considerate treatment of British Parents, and that Training—Moral and Intellectual—which is, fortunately, so characteristic of the best form of Education as practised in Britain.

CICERO.

SPECIAL TELEGRAM FOR "STANDARD."

Montevideo, Sept. 16,
6.20 P.M.

Great thunderstorm, accompanied by rain and hail, which lasted from 11 a.m. to 3.30 p.m. Owing to this business was suspended. No steamer to-night for Buenos Ayres, as it is still raining.

Bank paper 15¼ dis.

Rio Janeiro, Sept. 7.

Exchange on London, considerable amount done at 19 to 19¼. Closing bank rates 18¾.

Exchange on Paris, 2¼ millions francs passed, at 4.85 to 5.15.

THE NEW TARIFF.

No greater proof of the mediocrity of our legislators can be asked than the proposed new Custom House Law which has just passed the Deputies and now lies before the Senate. As usual, half measures and fractional reforms; at last Congress men are opening their eyes to the fact that the enormous and unequal system of taxation legalised in the Custom House is annihilating industry — and yet our legislators lack the courage to strike out on a bold straightforward course, based upon sound political economy.

What the Senate will do with the bill we have yet to see, but we confess we should not be surprised to read that after a brilliant discussion the house resolved to abolish the tax on pins and needles and increase the duties on wool.

Our colleague the *Republica* very justly remarks that the press of B. Ayres should pay more attention to this important subject and omit politics. There can be little doubt if the native papers would devote as much time and space to attacking the import duties on coal, iron, and lumber as they do in abusing Messrs. Sarmiento and Mitre, those injurious duties would be abolished.

The bungling efforts of the Deputies in trying to liberate steamboat building proves the willingness of the house to effect good, if only shown the way. Boilers for steamers, henceforward, will be admitted free of duty, but everything else necessary for the building of a steamer must pay 23 per cent., whilst, on the other hand, steamers built abroad come in duty free? Why let the boilers in free and not the iron plates, bolts, &c., that go into the ship? The discussion on the matter was long and stormy, but no man of practical experience spoke to the question. The result is that boilers can be imported free of duty, but, if made in the country, they must pay 23 per cent. duty. Can anything be more monstrous than such legislation in a young country, where steamboat building is just raising its head? Why not at once fine and imprison any man who attempts to build a steamboat or a lighter in the Plate? There would be far more honesty in such a course.

Again, we have Congress admitting machinery for the Benitez Meat Extract Company free, whilst they lay on 23 per cent. import duty on the coal which the factory must consume to keep the works going. There is a deep hypocrisy in this bit of legislation, for the tax on the machinery, at best, only has to be paid once, and is a matter of a couple of thousand patacons, whilst the duties on coal must be paid each month, and at the lowest calculation must average fifteen thousand patacons a-year. The willingness of our Congressmen to aid the new industry is, therefore, sufficiently transparent; and let our readers take note that right across the river, in front of Gualeguaychu, M. Giebert, at the Fray Bentos Liebig Extract Company, pays no duty on coal whatever.

Then as regards salt duties, at last Congress finds it impossible to continue the tax on this article, which is a necessary article for our saladero industry, but which up to the present pays double duty, namely, import duty, 23 per cent., and again export duty, which is levied on salted hides and jerked beef.

There are three staple articles of importation which should be admitted free of duty,—COAL, LUMBER, and IRON,—and so long as Congress levies one farthing import duty upon these staples, so long will the industries upon which they depend languish.

We charge the legislators of this country with ever taking but a superficial glance at the economical machinery of society. Congress not only neglects to protect native industry but positively does its best to annihilate it.

We have now no time to enter into a disquisition upon the very grave errors of legislation as regards every thing connected with our industrial interests. The state of the producer in this country is truly deplorable; his voice in Congress is unheard; all the Deputies and Senators are consumers, they legislate for their class, for the wants and requirements of that class, and hence the error. It is probable that this year we shall have a surplus wheat crop, but the grain must rot in the fields if the prices in this market rule low, because the export tax on wheat is maintained, and amounts to a prohibition on exportation.

Until this year we never produced sufficient wheat to meet the consumption, yet Congress, to be beforehand with the farmer, has long since established an export duty on the cereal.

In this country, at the rate we are going on, labor can never produce more than is required for its support. Agricultural capital can rarely yield a profit, because the taxman lays his hand on everything; our home market is so limited, that when prices run down, they are insufficient to pay freight on the bullock-carts, and, as has frequently occurred in B. Ayres, Indian corn is *used for fuel*. If cereals could be exported free of duty, then producers might try other markets, but situated as we are at present, if the wheat crop comes in well this year, prices will rule so low, and the export duty so high, that possibly the best use we can turn our surplus wheat to, will be to throw it into the 'pantanos,' as is often done with jerked beef, and thus repairing the roads.

What is the general profit of the country? Can any man answer? It should be what the productive power of labor makes it; but with taxes heaped upon taxes, and imposts upon imposts, the general profits of the country must be simply whatever our soldiers can win for us; for in every branch of producing industry we hear the same complaint.

The producing class in this country is the most impoverished, and until our legislators turn over a new leaf, the same anomaly must exist.

MONTEVIDEO.

From our Special Correspondent.
September 15, 1868.

The report that several cases of cholera have occurred in the allied camps in Paraguay, although contradicted and stated to have been due to cases of poisoning, has sounded a note of alarm which has found an echo in our local press. The 'Siglo' calls the attention of the competent authority to the very defective state of the main sewers which cannot fail to be a source of great danger for the public health, and which is applicable both to their size, form, and mode of construction, as well as to the inferiority of materials employed, want of proper means to cleanse them and remove the dirt, and absence of proper ventilation. It also alludes to some of the measures that ought to be adopted to remedy the present defective system, and among others, to oblige owners of houses to comply strictly with the Board of Health's dispositions; to enforce as a general rule that all sewers should be constructed of a non-absorbing material, and should have sufficient declivity to insure a current strong enough to carry off all the dirt, by the aid of rain water for the present, and whenever the city is endowed with a water supply, a portion of it can be destined to this purpose. To use disinfectants in the highest parts of the city and the lateral entrances of the lower parts in order to prevent the wind from carrying the mephitic gases into the houses and into the air; and to prolong the main sewers further into the sea so as to insure that the fecal matters should not remain exposed on the shore at low tide and become a source of infection. Particular attention is also called to the water-closets, in whose construction the authorities are bound to watch that the principles of higiene are properly attended to.

The movement initiated by the *Siglo* for the formation of popular libraries is meeting with universal favor, and is undoubtedly a step in the right direction. It remains now to be seen whether there is sufficient perseverance in its authors to see it successfully carried through, or whether it will go to swell the number of those good intentions that are said to pave the road to a certain warm place.

The Committee of the Public Library and Museum seems animated by the most praiseworthy energy in carrying out the trust confided to it of ameliorating the condition of these two important institutions. I alluded yesterday to a notice addressed to the public calling for contributions, and to-day I have to notice a circular addressed to all the Juntas Administrativas of the various Departments, to the Gefe Politicos, to the Medicos de Policio, Curas, and Farmaceuticos, giving detailed instructions for the remission of objects of Natural history for the Museum—including every kind of tree, plant, and seed produced in the district, the different species of insects, buttterflies, worms—shells and shellfishes, if any—snakes, serpents, frogs, &c.—both fresh water and seafishes—every species of birds, from the smallest to the largest, with their nests and eggs—and, lastly, every species of quadrupeds, such as murcielagos, comadrejas, gatos montés, hurones, aguarás, foxes, skunks, peludos, cuatis, tucu-tucus, &c., &c.; specimens, likewise, of fossil bones that are often met below the earth, as well as the various kind of colored earths, marble, minerals, stones, &c.—in short, any object of curiosity or interest.

The *Tribuna* publishes in full today the statutes of the new company Progreso Oriental, whose object is the establishment of a mortgage bank, the acquisition of landed property to promote the circulation of capital, and the construction of public and private buildings. As I have already mentioned, the capital is set down at two million, in twenty thousand shares of one hundred dollars each. This new society, of which Sr. D. Agustin de Castro is the originator, counts already a large number of shareholders, and will ere long begin its operations.

Owing to the great fall of rain we had last week, at the crossing of Calles Canelones and Juncal a large body of water collected there, formed a big lake, which nearly threatened to overflow the houses of the neighbourhood, whose owners were consequently kept in a state of great alarm. The Board of Works should at once remedy this crying evil, and, by opening a communication with the main sewer, obviate the great inconvenience the neighbourhood is exposed to whenever it rains.

Mr. Vaillant who for many years was connected with the *Siglo*, has been appointed a member of the Board of Public Health. The appointment has given general satisfaction.

The *Telegrafo* of yesterday says:—The English barque Queen of May which sailed from Acajutla (San Salvador) for London, with a cargo of coffee, put into this port yesterday, having lost her main mast. Her captain reports that in S. Lat. 55·10. and W. Long. 61., a heavy gale came on. The vessel being struck by a heavy sea was thrown on her beam ends and he was obliged to cut off her main mast in order to set her right again. She was then found to have two feet of water, and as the pumps were covered by the coffee, he was obliged to throw overboard about 500 bags. The men were almost all rendered unserviceable by exposure to cold, The captain says that during thirty years experience as a sailor, he never experienced such weather, and it was only due to the excellency of his ship that he was saved from a wreck that seemed inevitable.

A great Masonic feast took place on Saturday last, given by the Concordia Lodge on the occasion of the adoption of children a ceremony purely moral in which mothers, sisters, and wives of the Masons are permitted to participate. It is the only occasion on which the fair sex is allowed admittance within the precincts of a Masonic Lodge, and the natural curiosity raised in the feminine breast by the mysteries of the fraternity gave an additional zest to the attractions of the occasion. More than 400 people attended, and dancing was kept up with great spirit till 4 o'clock in the morning—and only interrupted during the time necessary to do honor to a splendidly-laid supper table.

The weather is still very unsettled, but the abundance of water that has fallen makes all camp people feel hopeful of a splendid season.

O. M.

LATEST FROM ROSARIO.

[From our own Correspondent.]

Rosario, Sept. 14.

A special messenger arrived at Villa Nueva from Mendoza before the train on the 11th inst., with the news of a dreadful calamity on the southern coast of Peru. The seaport town of Arica in Lat. 18·20. S., Long. 70·20. W. of Greenwich, has been completely destroyed by earthquake and the rising of the sea, which swept over the doomed town at a height of thirty yards above its ordinary level. Both the native papers of this town state the scene of the disaster to have been much more extensive, but the accounts so much contradict themselves and each other, the truth can not be got at. These periodicals say that Arica, Chala, Caldera, Iquique, Megillones, Pisco, Pisagua, Tacua, and Talcahuano have participated in the catastrophe, and that much shipping has been destroyed; their information is said to be obtained through the telegraph of this railway. After some details, they have received another telegram, which says that further accounts cannot be given, yet further lengthy descriptions are gone into. The writer respectfully begs to remind his readers of the impossibility of telegraphic news from this railway, as the wires are connected at neither end with a battery.

A branch line is immediately to be constructed from the main line at Villa Nueva to Yucat, a distance of three leagues; Yucat is an extensive property owned or rented by the Contractors and used by them to supply sleepers and fuel for the whole line. The length of earthworks of the trunk line now completed is three leagues; at present about 170 navvies are employed, and increased force is likely to be used as labour is obtainable at a cheap rate. In the construction of the line to Rio Segundo, no rails are to be laid until the earthworks are completed; there may be many reasons for this decision, but one is most conclusive, the Company have no rails for the purpose in the country. On Friday last the handsome Iron Girder Bridge crossing the Rio Tercero at Frayle Muerto, and connecting the town with the Railway Station, was opened in the presence of Messrs. Wheelwright, Woods, and Moneta, the first-named returning the following day to Rosario. The benefits conferred on the country through which this railway passes are inestimable, in addition to the costly structure erected at Frayle Muerto, two other bridges of less pretension though not less useful have been constructed in the neighbourhood of Tortugas and Cañada de Gomez, to facilitate communication with those stations.

At Villa Nueva on the 13th a fire broke out in the weighing room of the Station; luckily the flames were soon got under, no greater injury occurring than the destruction and damage of some maiz.

Report says that a number of influential English and native gentlemen propose establishing a new racing club here, and that training stakes are being erected by Messrs. M'Craith & Co., of Calle Libertad. Some names of native gentlemen have been seen who, it is said, will give it their support; their wealth and influence is great, and, as the Santa-Fé Club is said to lend their influence to the scheme; it should become a successful reality.

During the past few days there have been frequent rains, though not of long duration; the effect of them will be more pleasantly felt hereafter by cattle owners, as many beasts are dying from the too free indulgence in the liquor they have so long been without. The dire effects of the late drought are strongly impressed on the mind, in passing through the province in the train, by the quantity of dead animals seen lying on the ground: these deaths are considerably felt in the meat market; capones sold a few days since at $1 each, now fetch $2; beef at the same time $1 the arroba, realises $4 at present.

Consul Hutchinson has altered his arrangements as to the time of his arrival in Rosario; he states in a letter to his *locum tenens* that he anticipates being in South America in November next.

La Capital states that a Vice-Consulate for the sister Republic of Bolivia is in a few days to be opened in this city.

Besides the building operations going on in all parts, there is little other commercial news; not a vessel of any size has anchored in this port during the past four or five days, the Vulture and Obey are chartered by Messrs. Thomson and Co. to load bones and bone-ash in the Uruguay, and the Ariadne with coal from Cardiff, consigned to the same firm, is expected in port during the week.

An Italian tenor, Sr. Felippi, one of the operatic troupe, which for some time past has performed many operas in the theatre and is about to leave this for Cordova, sang at his benefit with considerable taste an English song from the Bohemian Girl, which, had it not been for the opposition of the natives, would have gained an encore.

This was a happy thought and intended by the originator of it as an acknowledgment of the encouragement he had obtained from the English speaking public here; at the same time it was a propitiatory offering not less acceptable for its rarity.

SPHINX.

EDITOR'S TABLE.

Yesterday we had a sort of volcanic storm, the new moon has come in with rain, so we suppose we must look for a wet month. Rain at the present moment must be regarded as extremely healthful; so if the streets are impassable, and the town besieged with pantanos, at least we can console ourselves with the reflection, that a hygienic points of view, the weather is favorable

The Rosario Reading Club has favored us with a copy of its rules and regulations, which we are printing in a pamphlet form for the Club. This new Club speaks for the progressive spirit of the British community in Rosario.

There can be ne doubt Rosario is rapidly going ahead.

The friends of Dr. Connolly, formely of the Doterel, will be glad to hear of his promotion, the Doctor is now in the "Lion" and has been ordered to the coast of Africa.

A subscriber from the 9 de Julio informs as, that several English farmers are about to establish sheep farms at Quinigui, some 8 leagues beyond where the present English settlers exist. The lands are good, and can be bought for from $15,000 to $20,000 per league. Some small points of sheep have been sold out there at $20.

The "Republica" yesterday published an excellent article on export duties written by Sr. Don Felipe Senillosa; the article is to the point, and shows up the unfair system of taxation established by law in this country.

An Entre Riano estanciero (English) informs us that he has sold some sheep to deliver after shearing, at the rate of three patacons, the seller being obliged to find camp for the sheep. The price of sheep in Entre Rios seems to be looking up.

The Masons in town are about to give the President Elect a grand banquet. Great preparations are going on, and it will probably be one of the most splendid Masonic banquets ever given in this city.

There seems to be no doubt now about Lopez having left Villeta and fallen back on Villa Rica. The next move on the part of the Allies will be the occupation of Asuncion. When the river is open to Asuncion the Parana steam line (Matti's) will put on more steamers, and give a run of excursion trips.

The 'Tribuna' announces authoritatively that General Emilio Mitre has forwarded to the Government a proclamation in which Caceres is outlawed, stating that he was setting out for the purpose of reducing the rebel chief into submission.

The ceremony for laying the foundation stone of the Waterworks, in front of Mr Hale's Quinta, below the the Recoleta, that was to have taken place to-day, has been put off to Sunday next, 20th inst., weather permitting.

Yesterday the mortal remains of D. Raphael Bilbao were accompanied to the Ricoleta by a great number of his friends. He belonged to a talented family and one of his brothers Don Manuel Bilbao took a leading part until a short time back in the editorial labors of our much esteemed colleague, the 'Republica.' The deceased died of consumption after a long and lingering illness, and we offer to his sorrowing relatives our most sincere condolence.

The committee of the relief fund for the families that have survived the direful calamity by earthquake in Peru held their first meeting on Tuesday night, and the following gentlemen were added to the list already published:—Don Ventura Fernandez, Peruvian Consul, and D. Manue, Perez del Cerro.

The Commission of the Asilo de Mendigos has sent in a report to the Municipality of all the donations received since the year 1855, which amount to about $50,000.

A subscriber from Gualeguaychu informs us that this winter the place is unusually gay. Ex-Governor Dominguez gave a grand dinner party the other day, at which Mr. Mc Namara and other English gentlemen attended. Sor. Dominguez gives weekly soirees at which the wealth and fashion of the town attend.

We learn from our colleague, the *Tribuna*, that D. Emilio Castro has received by the last packet the plans and estimates of the iron mole for the projected port in the Catalinas. This is great news, and, if the project is sanctioned, as there is every reason to hope, this important work will not be long in being carried out, since all the preliminary studies have been made.

Some ingenious party, calculating the difference of latitude and of the clocks, has arrived at the conclusion that the dreadful earthquake in Peru took place six hours before the terrible hurricane of the 13th here, which, as our readers will remember, caused so much damage in our port, in and about this city, and at several points in the camp.

A correspondent from Goya writes: "We continue to have balls and tertulias almost every night, and twice a week we dance in the house of General E. Mitre, who has his family here. It appears we are to remain here some time longer as Colonel Vedia, Chief of the Artillery, is also expecting his family to come from Buenos Ayres, and has rented a large house for that purpose.

We are happy to hear that the Government is taking active steps for the removal of Messrs. Ambrosio Lezica and Co.'s very objectionable graseria in Palermo. Don Emilio Castro, to whose indefatigable and well directed efforts the country owes so much, has taken an active part in obtaining so desirable a result, and deserves our best praises in the name of the community in general. We understand that Messrs. Lezica and Co. intended removing their establishment below Belgrano, but the Municipality of that town have very properly refused their consent. They have now purchased the quinta Moreno on the Maldonado arroyo, opposite the Chacarita de los Colegiales, for the purpose we suppose of carrying on their operations at that spot.

With reference to an advertisement in another column of Messrs. Cranwell and Murray we find the following in the "British Trade Journal of 3rd August." Messrs. Peek, Frean, and Co have obtained Letters Patent for an invention relating to the manufacture of biscuits, containing Liebig's Extract of Meat. According to their own statement the properties of the extract remain unchanged during the manufacture, and each pound weight of the biscuits contains the quantity of Liebig's extract obtained from three pounds of the best meat. We have no reason to doubt this statement, as the biscuits have the unmistakeable odour and savour of the extract. They are certainly very nice, and we should imagine that they would be very acceptable to travellers, tourists, sports men, and all who are prevented by pleasure or business from taking their meals at the usual times. The biscuits are circular, 64 weighing 1 lb, and they are sold in pound and and half-pound tins."—*British Trade Journal Aug. 3rd.*

We have received the July number of the "Revista de Buenos Ayres." Dr. Vicente Lopez continues his interesting researches, and enlightens us as to the astronomy of the ancient Peruvians. Mr. Luis Varela contributes some interesting historical studies. The present number maintains the reputation of the magazine as a useful chronicle of the past and a despiser of actualities.

The Government of the Province has allotted the handsome sum of 200,000 dollars for the erection of schools in the Partido of Chacabuco.

The opera of "Roberto il Diavolo" is repeated to-night at the Colon Theatre.

LATEST FROM HIGUERITAS.

September 13, 1868.

There are things coming to light every day in this town with regard to the conduct of our former Commissary of Police, Don Osbaldo Rodriguez, that horrify all who hear of them. Many of the barbarous and horrible cruelties and acts of injustice of this monster in human shape were comparitively unknown, because of having been committed in the beginning of the cholera, or during its prevalence, when all were flying away with consternation.

By late declarations taken in a criminal case, it appears, that after a man had surrendered and laid down on the ground as he was ordered to do, the Commissary hacked away at him with a 'facon,' and would infallibly have cut into the brain, according to the declaration of the doctor that dressed the man's wounds, if it had not been for the immense body of thick hair that the man had on his head; and after that brutal act, he had him dragged off insensible, to the cuartel, and put in the 'barra;' and it was not until the next day that medical aid was called; and when the doctor requested the man to be taken out of the irons, in order to dress his wounds, intimating that he would possibly die if kept in the 'barra,' in the terrible condition he was in, with five or six wounds in the head, some of them four or five inches long. The Commissary refused to have him taken out, saying, "dejadle morir no mas." And this man committed no crime whatever. He had simply committed the offence of taking too much liquor. And here in the nineteenth century, in a country calling itself christian and republican, they send these horrible petty monsters in the shape of Commissaries of Police, into the country towns, and allow them to do exactly as they please, and there is no redress whatever. One cannot help becoming bewildered when they seek to find out why these things are so. One naturally asks himself; is it ignorance, or is it wickedness, or is it debility, or or is it all three of these defects combined in the Government that exposes the inhabitants of the 'campaña' to such brutal outrages eternally; or is it occasioned by organic defects in the administration of justice? Whatever it may be, steps should be taken, at once, to remedy this horrible state of affairs.

Of what use are men of unquestioned intelligence, and distinguished for learning, like Caballero and Herrera y Obes if they cannot administratively remedy such abuses! Their intelligence and their learning only serve to make the pictures more hideous; as the light thrown by the painter upon a scene of assassination serves to make it more vividly horrible.

VIATOR.

LATEST FROM CHILE.

Up to the present this winter has been the most rigorous that has been experienced for many years past. The rain-fall has been very heavy and in consequence the rivers have been much swollen. The line of the Southern railway has suffered considerable damage near San Fernando, and news continues to arrive from different parts of loss of life and damage to property. At San José de Maipu, a mineral district situated at the base of the Andes, to the east of Santiago, forty four persons are reported to have perished by avalanches, one alone of these having destroyed thirty-eight individuals. Notices of loss of life by drowning also continue to arrive. The cold has been, and continues unusually severe. Snow has fallen in Santiago, but as it was raining at the time, it melted as fast as it reached the ground; between Montenegro and Colina, on the Northern line, however, the case was otherwise, it having accumulated there to a depth differently stated at from one to two feet. The intermediate rang is covered with snow, and presents a very interesting spectacle as viewed from this city. This proximity of snow renders the air here unusually keen and biting. So far the weather can scarcely be considered as prejudicial to agricultural operations, though our farmers are already half inclined to abuse San Isidro.

The 'Libertad' says that is has been informed that within a short time the Archbishop of Santiago, accompanied by one or two suffragan bishops, will leave for Europe, in order to be present at the Ecumenical council to be held in Rome on the 8th of December next, to consider the question of celibacy of the clergy.

We are informed that Admiral Turner has been appointed to the command of the U. S. squadron in the Pacific.

The Government has ordered a naval training school to be established on board the Thalaba, commencing from the first of March next year. This measure is calculated to supply a want that has been felt for years the formation of a superior class of seamen.

Some few years ago, a Frenchman named Orelie A. de Tounens made his appearance in Araucania, and managed by some means so to influence some of the tribes, that he was received as a kind of ruler among them, and incontinently assumed the title of king. The Chilian government, however, did not seem to see the matter in the same light as Monsieur Tounens, and having made him prisoner, shut him up for some time in the Santiago lunatic asylum, and at length sent him back to his native country. He has since been known for the persistency with which he has been worrying the French authorities with petitions and manifestoes, but has managed to drop out of sight altogether of late. That he is not yet defunct, however, the following note to the Minister for Foreign Affairs of France will show, in which he demands nothing less than that country's intervention—a request which we believe the Emperor Napoleon will be rather loth to comply with after his Mexican experience. It is as follows:—

The Chilian government in arresting me in territory not belonging to it, has violated the rights of nations, and caused me an immense and incalculable injury. In a pamphlet that I have just published under the title of "Letter to the members of the French Parliament, I have shown the legitimacy of my rights, supporting myself by means of authentic documents, chiefly emanating from the Chilian government itself; I now add to that the following, recently published in French and foreign journals—"The Chilian Government has sent to Araucania an expedition, under the command of Colonel Saavedra, to put an end to the incursions into Chilian territory. Colonel Saavedra has acted more like a diplomatist than a soldier, and has concluded a treaty with the Huilliches tribes, by virtue of which these tribes consent to the occupation of their territory."

The province of the Huilliches is just that in which I was made prisoner on the 5th of January, 1862, and now, scarcely six years after this odious abuse, Chile has entered into a treaty with the Araucanian chiefs to occupy that portion of the country. The territory in question consequently enjoyed complete independence in 1862. This is a feat of capital importance when an act of violence perpetrated against a French citizen is in question —of his illegal arrest, and an imprisonment which has caused him more than a thousand misfortunes, suffering and priviations of all kinds —an irreparable injury.

I thus have, in my quality as a French citizen, a right to demand indemnification from the Chilian government, and to claim the assistance of the government of my country in obtaining it. I may add that this revolution is a duty for me—as it should

be for the government, not to permit, in any part of the globe the rights and dignity of any of its subjects, or of France—his glorious country—to be wounded.

My illegal arrest by the Chilian authorities has been the cause of my ruin; for, having realized all my fortune for the purpose of going and establishing myself in Araucania, Chile has made me lose all, in banishing me from that territory, to the violation of the rights of nations.

Your old and honorable colleague, the Marquis de Lavalette, accorded me a subvention; his honorable successor did the same, and in a letter of the 20th of January last I had the honor of expressing my gratitude. I yet have to thank the deputies of my department and M. Borredon, Councillor of State, for having contributed to this principle of justice. But you understand, Sir, and I hope that the government will understand also, that the subvention in question is not sufficient to compensate me for the injuries I have received from Chile.—I have, &c.,

(Signed)

PRINCE ORELIE A. DE TOUNENS,
King of Araucania.

ROSARIO GAS WORKS.

DESCRIPTION OF WORKS.

Rosario, Sept. 9.

The works are situated between Calle Cordoba and Rioja, and have a river frontage of 150 varas. They are favorably situated for supplying the town with gas, being about 80 feet below the lowest point of supply to the principal part of the town; the buildings and machinery are substantially got up, as several of your numerous readers will judge from the following particulars.

The buildings consist of retort, boiler, engine, purifier, meter, governor, and dwelling houses, together with a suitable residence for the foreman, or capataz, storeroom, carpenter and smith's shops, &c.

Retort House.

The retort house is a brick building 90 feet long, 57 feet broad, and 20 feet high to the level of wall plates, and is capable of holding 18 beds of retorts, each bed having a setting of seven retorts; the roof is wrought iron, and consists of eight principals of the best Staffordshire wrought T iron, and having a corresponding number of angle iron purlines; each principal is strengthened and supported by six cast iron struts, with wrought iron tie rods, queen bolts, &c., each principal having two cast iron shoes fixed into the brickwork with anchor bolts; the louvre or ventilating roof is 70 feet long, 16 feet broad, and 4 feet above the ridge of main roof; the covering is of galvanised corrogated wrought iron, number 16, Birmingham wire gauge, and is securely riveted together with double rows of galvanised rivets, hook bolts, &c. This house is now thoroughly finished, and is admired by all persons visiting the works.

Boiler House,

The boiler house is twenty-nine feet long, fifteen broad, and eighteen feet high, and is furnished with a cornish flue boiler of twelve horse power, with all the necessary fittings; steam and water gauges, safety valve, cast iron self-acting damper, &c. One of Giffard's patent injectors will be also fixed to the boiler in a short time.

Engine and Exhauster House.

The engine and Exhauster house is twenty-nine feet long, twenty feet broad, and eighteen feet high; and is well supplied with a ten horse power horizontal steam engine, interlining shaft with driving pullies, &c. When at work it will communicate motive power to a twelve thousand per hour patent exhauster, lathe pumps for water, tar and ammonial liquor, and several other appliances which it will be found economical to communicate motion to when the works are finished.

The exhauster is one of Beales' patent rotary ones, and is capable of passing twelve thousand cubic feet of gas per hour, at an average speed of 120 revolutions per minute. In connection with the exhauster is the bye-pass and regulating governor; the bye-pass is a ten-inch valve, which allows the gas to pass freely to the purifiers station meter and holders. Providing that the engine or exhauster should happen to be stopped or out of order, the regulating or exhauster governor regulates the flow of gas to and from the exhauster in due proportion to the amount producing at the time: it is self acting, and is one of the most useful machines in connection with gas works where an exhauster is in use, for, while it freely permits the gas making at the time to be drawn away, it admits of no atmospheric air to mix with the gas, in the event of the exhauster being overworked. I may mention that the effects of the overworking of the exhauster are often too plainly visible in the gas so produced and supplied—viz., a large blue flame is emitted from the burners without giving an illuminating power in proportion to the size of the flame or the gas consumed and registered on the house meter, for I need scarcely inform your readers that the house meter registered the amount of air passed through it as gas. To obviate those defects in the manufacture and supply of gas, this governor has been erected; also in connection with the exhauster and governor is a self-acting register, which records on paper the different speed or motion given to the exhauster, and serves, at the same time, as an efficient check on the man in whose charge these apparatus are placed.

Purifying house and purifiers; the house for the purifiers is sixty-three feet long 29 feet broad and 18 feet high.

The purifiers are four in number, and are of the following dimensions viz: 10 feet square, by 5 feet high, having a water lute of 18 inches deep, Each purifier is provided with four tiers of wooden trays [or sieves], the advantages of this class of trays are now fully recognised and are adopted by all the gas companies, both in England and on the Continent; as they possess the advantage of being incorrodable by the impurities contained in the crude, or foul gas, passing through them; they are light, and easily removed, and can be repaired at any time by the carpenter employed on the works. I may mention that the class of tray at present in use in several of the gas works of South America, are made of perforated sheet iron, which is continually corroding, and has to be scraped, and the holes picked so as to admit the gas to pass through them to the purifying materials, and in many cases where a watchful eye is not kept over the workmen so employed, the cleansing of the trays are quite ignored, and the consequence is that the gas having to pass through a smaller surface of the purifying material, saturates the material with impurities, in a short time, the gas becomes impure itself, and in many cases enters the gasholders before it is detected, and eventually is delivered at the burners in your private houses, and becomes a nuisance, because it gives a defective light, blackens your glasses, tarnishes the gildings and picture-frames; and leaves a deposit of soot on the different articles in the room where it is used. These defects in the manufacture and supply of gas to Rosario, will be entirely done away with. In connection with the purifiers is the centre, or hydraulic valve. It is cylindrical in shape, with a series of ten-inch vertical pipes in the inside. Those pipes, in connection with the compartments in the cover, allows three of the purifiers to be worked alternately, and, at the same time, throwing out of use for the purpose of cleansing and recharging with fresh purifying materials.

Meter Houses.

The meter house is 29 feet long, 15 feet broad, and the same lighters, boiler, engine, and purifier houses. In this house is fixed the station meter, governor, and pressure registers.

The station meter is capable of passing and registering 15,000 cubic feet of gas per hour, and is fixed in a square case, with circular roof. It is neatly ornamented in front, with pilasters and moulding, index clock, and is now fixed with all its connections.

The Governor for regulating the pressure or flow of gas to the town, is one of the best patents of this class of machine now in use in the different gas works in England. The advantages are, that it cannot tilt or allow the gas to escape, thereby, doing away with the danger of a gas explosion in the governor house which has so often occurred on gas works with the old style of governor in use; also the action of the holder on the cone is so gentle and regular that it entirely does away with the complaint of jumping or unsteady light which so often takes place, both in private and public lights, which in most cases is attributed to defective house meters, condensation in the fitting, irregular lighting and extinguishing of the public lights, &c. But I admit that the great amount of complaints occurring under this head, may with all justice be attributed to the defective manufacture and action of the Governor.

The Gas Holders.

The gas holders are two in number, fifty feet in diameter; and twenty feet deep, and are made of sheet iron, number 17 Birmingham wire gauges, the frames are of the best Staffordshire T and angle iron. The tanks for those holders are of cast iron, fifty one feet, six inches in diameter, and twenty feet deep; they are cast in plates of the required segment, and when fixed will be bound together with ten wrought iron bands on each tank. Each tank is provided with six ornamental tripods or columns, firmly secured to each other with wrought iron trellis worked with girders; each tripod is 21 feet 6 inches high. The tanks when finished will be both substantial and ornamental pieces of work.

The condensers and scrubbers are in due proportion with the other machinery. The hydraulic mains are made D shaped, and are of the best Staffordshire wrought iron, with ten-inch outlets. I may mention that all the connections on the works are ten inches in diameter, particular attention being paid to this part of the works. As small connections at first in the erection of gas-works, is one of the greatest sources of expense to gas companies, as in a few years the smaller size of connections, are found not only to be too small, but in several cases to be corroded with tar and other foul matter, so that the amount of gas produced and supplied, is found insufficient to meet the requirements of the gas consumers; and, in several cases, all the connections have to be taken up and enlarged, which, at all times, is difficult, and in most cases more expensive than the erection of new works.

The dwelling-house on the works for the resident engineer is a two-story one, having ample accommodation for offices, residence, &c. It is very neat and ornamental, and Mr. Carmody, the builder and contractor for the works, has just got great praise for this building, and has also got several orders for the erection of private dwellings of a similar class to this one.

I have omitted to describe several other important matters in connexion with the works, through not wishing to trespass too much on your valuable space, which I fear I have already done, and can only make amends by wishing the 'Standard' newspaper and its Editors all the success and prosperity which both so richly deserve.

I remain, Gentlemen,
Yours truly,
J. P. O'FARRELL.

ON 'CHANGE.

Sept. 16, 1868.

Ounces	400
Sovereigns	122½
Patacons	25
National Bonds	52⅝

Bonds ruled flat to-day; very little speculation either way. The general opinion is that Bonds have not yet touched bottom, and consequently the bulls for the present avoid the market.

To-day the meeting to consider Mr. Castro's application for an office for the Rosario Telegraph Line was held at the appointed hour; the application was rejected without discussion, the Bolsa being almost too small at present to accommodate the mercantile public during the busy season. It was said at the meeting that the National Government thinks of purchasing the premises for a Post Office, and even the price stated, two million dollars.

The Bolsa will be open to-morrow (Thursday), but in consequence of a vote of the committee, no bond transactions will be quoted on the board. The Provincial Bank will be open until one o'clock, and we believe the other banks will follow the same rule.

The cash sales of Bonds to-day amounted to 21,000, at 52⅝.

For Sept. 30	90,000	52⅝
Saturday	8,000	52⅝
Total sales,	125,000.	

A sale of wool on contract was announced to-day at reserved prices. It was generally believed, however, that the wool is from the Moreno estancia, near Canuelas, and the price $65, deliverable on the 5th October.

Mr. Chas, we hear, has sold seven rams, recently received from Europe, at $5,000 m|c each, and has been offered for two others $8,000 each, which he declined.

In the produce markets nothing doing. Money still rules easy, and first-class bills done at 9 per cent. per annum.

Nothing more to-day of the recent failure.

LANMAN AND KEMP'S PURE MEDICINAL COD-LIVER OIL.—Because hectic fever has tinged the cheek, do not say "it is too late," there may yet be time to arrest it. If there is a spark of recuperative vigor in the vital system, feed it with LANMAN AND KEMP'S PURE MEDICINAL COD-LIVER OIL. It may rekindle the vital energy of the system. If there are ulcers, there is nothing so balsamic and healing; if there is irritation there is nothing so soothing; if there is weakness, there is nothing so invigorating; if there is attenuation, there is nothing so fattening.

But see that you have the true article. The ordinary cod-liver oils are impure always, and often without one drop of the genuine article. Have nothing to do with them. See that the name of this respectable firm whose indorsement is a guarantee of purity and genuiness, is on the label of your COD-LIVER OIL. In that case you are sure that the preparation is the best that can be produced by skill and science. Sold by leading druggists universally.

SARSAPARILLIAN,
AND ITS
POWERFUL CURATIVE ASSOCIATES.
Prepared under a Newly-Discovered Process for Extracting the Curative Properties from Vegetable Substances, enters into the Composition of
DR. RADWAY'S
RENOVATING
RESOLVENT.

A NEW PRINCIPLE DISCOVERED.

One Bottle of Resolvent is better than ten large bottles of the advertised Sarsaparillas, or direct Diurotic Remedies.

Physicians wonder at the extraordinary power of Radway's Renovating Resolvent in curing the worst forms of Scrofulous, Syphiloid, Chronic Skin Diseases, and its marvellous power in resolving calculous concretions, affording immediate relief and consequent cure of Diseases of the Kidney, Bladder, Liver, Lungs, Pancreas, Spleen. Its rapid influence in the cure of Diabetes, Incontinence or scanty, turbid, albuminous, cloudy urine; its almost instant efficacy in stopping itching and painful discharge of urine, and its singular power in curing discharges from the Uterus and Urethra, Leucorrhoea, Bloody Urine, and other unhealthy and weakening discharges; and enquire wherein the Sarsaparillian used in the Renovating Resolvent differs from ordinary Sarsaparilla. Sarsaparillian is the only principle in Sarsaparilla that possesses curative properties; all other parts of the root are inert and useless. One ounce of the extract obtained under Dr. Radway's new process for extracting the curative properties from vegetable substances, contains more of the true principle of cure than 20lbs. of the ordinary roots.

Sarsaparillian is only one of the ingredients that forms this truly wonderful medicine; and it is the only compensating remedy that communicates its purifying, cleansing, and reinvigorating properties through the Blood, Sweat, Urine, and other secretions, securing a harmonious functional action of every depraved organ and gland in the system. If the blood is corrupt, the Resolvent will make it pure. If the lungs are ulcerated and sore, secreting thick phlegm and purelent matter, the Resolvent will loosen this deposit and repair the wasting lung with sound and healthy materials. If the skin is covered with pimples, spots, pustules, sores, ulcers, &c., the Resolvent will quickly remove these annoyances. If mercury is deposited in the bones and has accumulated in the system, the Resolvent will drive it out. If the throat or bronchial glands are ulcerated, the Resolvent will cure these signs of an early waste. Direct remedies, possessing only exclusive properties, are hurtful, as they increase the functional secretions of one organ by suspending the constituent secretions of others; hence, a compensating remedy like the Resolvent is the only means of a permanent cure.

Bear in mind that every drop of blood impregnated with the Resolvent and absorbed to supply the waste of the body, will make pure, sound, and healthy flesh and fibre. The first dose that is taken commences its work of purification and increasing the appetite and flesh.

R. R. R.
THE GREAT REMEDY FOR HOME PURPOSES.

Taken Internally—Half a Teaspoonful diluted in Water, is a pleasant Drink—stimulating and strengthening.
Applied Externally—When there is Pain or Inflammation, affords instant ease.

Radway's Ready Relief
IN ITS SIMPLICITY AND GRANDEUR.

R. R. R.

We will first consider in its capacity as a specialty our far-famed remedy Radway's Ready Relief, symbolized throughout the civilised world under the significant alliteration R. R. R. This remedy is happily possessed of properties that give immediate and positive proof of its excellence, that the most sceptical can feel its power, in a few seconds, especially where the sufferer is the victim of excruciating pain. It is not a question with this remedy of time it takes to remove the perception or sensation of pain, or of the cost; for the moment it is applied to the part of the body where pain exists the patient is relieved. And if the pain is from an established disease, a cure will soon follow.

The Ready Relief is a vegetable remedy. It is pure, safe, and innocent. It is quicker in subduing pain and making the patient comfortable than Morphine, Chloroform, Ether, Opium, or any other agent. Its simplicity of application renders it a valuable household necessity, and its usefulness covers the entire range of family accidents that are liable to occur at any moment. The Ready Relief should be kept in every house, for if any injury or accident occurs to a child or grown person, its use will prove of immediate service. It matters not what the difficulty may be. Burn, Scald, Fall, Bruise, Cut, Wound, Poison, Sprain, Strains, Pain, Ache, Cough, Cold, Croup, and a hundred other annoyances that are constantly taking place in every family, this Ready Relief will, in a few minutes, prove its value. If suddenly seized with sickness, and you have no faith in medicines, but wish for a doctor, the Ready Relief will suspend or check the progress of the disease at once, and, in ninety times out of one hundred, cure the patient before the doctor arrives. It can never do harm; but will always do good. Its grand power is the prevention and cure of pestilential and contagious diseases.

It is in diseases were immediate and absolute assistance and relief is required wherein this remedy proves its superior, and we might say, supernatural Power in saving life, and promoting health.

In cases where Epidemic Diseases, Pestilence, Small Pox, Fevers, &c., exist, this remedy proves the potent power of a disinfectant, neutralizer and cure. No one that uses the Ready Relief when Asiatic Cholera, Yellow Fever, Typhoid Fever, Small Pox, Diptheria, &c., prevail in a community; will be seized with these diseases; and if seized when using it, will be cured if the directions are followed. Simple as this remedy is, it possesses the elements of cure of the most violent, painful, and fatal diseases that scourge the earth.

The properties of the Ready Relief are counter-irritant, rubefacient, anti-spasmodic, disinfectant, antiseptic, diffusive, stimulant, tonic, nervine, anodyne, anti-acid.

Its use in Asiatic Cholera, either as preventive or cure, is of more value to the world than all other discoveries in vogue.

It instantly secures rest, stops the Cramps and Spasms, and holds the constituents of the blood together, equalising the circulation, and preventing the separation of the watery constituents from the other properties of the blood, and arrests vomiting and purging. In Yellow Fever it is likewise all potent, and, with the assistance of Radway's Pills, will protect those exposed from attacks, and cure them that may be seized.

In Fever and Ague, Typhoid, Bilious, Scarlet and other Fevers, its use will always insure a cure.

In Rheumatism, Neuralgia, Gout, Tic Douloreux, Sore Throat, Diptheria, Influenza, in all cases of inflammation, the Ready Relief, assisted when required with its Resolvent and Pills, will surely effect a cure.

JOHN BULL STORE, 40 1/2 SAN MARTIN.

SAVINGS BANK.

BANK MAUA AND CO.

101--Cangallo--103.

BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Mauá & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depositary for their savings.

The sums deposited in that very important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks, artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in the immoral gambling, in lotteries, and other frivolities.

The Bank of Mauá & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositor a pass book, in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interest will be calculated up to date.

The Bank of Mauá & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Mauá & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867.

P.P. MAUA & Co.,
M. A. DE FREITAS AMORIM.

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

Second—The interest allowed is six per cent. (6 p.%) per annum, which is liquidated every six months.

Third—The depositors can at any time retire the whole or part of the money deposited.

Fourth—Once the money deposited exceeds twenty-five thousand dollars currency, or one thousand dollars silver, the depositor, if he wishes can open an account current, according to the rules established by the Bank.

Fifth—In case the depositor loses his pass book it can be replaced by another on paying twelve dollars currency, and advertising the loss in the public newspapers.

P. P. Mauá & Co.
M. A. DE FREITAS AMORIM.

FOR MONTEVIDEO.

THE SPLENDID  AMERICAN STEAMER

JAMES T. BRADY, CAPT. HENRY TATTERSON,

THE "GLYCERINE" DIP,

FOR SHEEP AND LAMBS,

FREE FROM ARSENIC, MERCURY, MINERAL AND OTHER POISONS.

DEADLY TO ALL PARASITES INFESTING THE SKINS OF SHEEP AND OTHER ANIMALS.

THIS PREPARATION is destined to supersede the Compounds hitherto Advertised, and which have a tendency to destroy Animals, injure the Men engaged in Dipping, and weaken the Wool by their caustic and reducing properties.

The "GLYCERINE" DIP can be used with perfect safety at any Season of the Year, and has been found in practice invaluable for the following purposes:—

I.—In Curing Scab, Killing Acari, Fags, Ticks, and other Parasites which attack the Sheep.

II.—In strengthening and adding lustre to the Wool.

III.—In Washing Sheep shortly before Clipping, leaving the Fleeces in a pure state.

IV.—In Dipping Lambs, even whilst suckling ewes, as they cannot be injured by the Material.

V.—In Dipping Rams at any Time of the Year, without danger of producing the excoriations which always follow the use of other Dips, especially in the Autumn Season.

From Sunday, 15th September, inclusive, the following alterations were made in the Traffic:—One third of the First Class Saloons are converted into smoking apartments, with communication with the other part of the saloons. The cars hitherto used as Smoking Saloons are used entirely for second class passengers. First class passengers will pay, as at present, five dollars, children from 3 to 10 years, three dollars; second class, three dollars, children two dollars. Return tickets, good for the day, will be given—first class eight dollars, children five dollars; second class five dollars, children three; also monthly tickets of first class for two hundred dollars.

Flag stations at Casa Amarilla and Barraca de Peña. Passengers wishing to alight there will give previous notice to the guard.

HARRY SIMPSON, Manager.
